Index to Volume 18

Authors

A

Abbasi, S.A. 42, 135
Amyotte, P.R. 56
Atherton, John G. 241

B

Baker, Q.A. 235
Balchan, A.S. 71
Bodman, Glenn T. 1
Brown, Anthony E.P. 121
Brown, A.E.P. 166
Buchier, P.M. 166

C

Chadwell, G. Bradley 206
Chatrathi, K. 56
Chervin, Sima 1
Cohen, Wayne 221
Crowl, Daniel A. 127

D

Dastidar, A.G. 56
Davis, Lloyd 212
Dieken, Dominique 151
Dowell, A.M. 214

E

Evon, Skip E. 1

F

Fisher, Harold G. 89
Foisselon, Pierre 17
Fuller, Brad A. 189

G

Going, J. 56
Gruhn, Paul 156

H

Hansen, Olav Roald 17
Hansen, Don 107
Hendershot, D.C. 113
Hobbs, Douglas H. 50
Holman, Michael 107

J

Jamerson, Scott C. 89

K

Keeports, G.L. 113
Khan, Faisal I. 42
Khan, Faisal I. 135
Klein, J.A. 71
Kletz, Trevor A. 64
Koch, Wolfgang 35

L

Leverenz, Jr., Fred L. 206

M

Maranghides, Alexander 31
Marszal, Edward M. 189
Mashuga, Chad V. 127
McConnell, R.A. 201
Modigell, M. 35

N

Ness, Albert 212
Noronha, John 115

O

Ogle, Russell A. 170
Osborn, Lucas W5

P

Paquet Jr., D.A. 71
Pequeno, Catela 82
Perlmutter, Barry A. 161
Pratt, Thomas H. 241
Prugh, Richard W. 5

R

Rose, Susan E. 206
Roßkothen, Hanns-Jürgen 35

S

Scheier, Ephraim 146
Scheuermann, Klaus P. 35
Schmidt, Jochen 35
Severin, Manfred 82
Shah, Jatin N. 189
Sheinson, Ronald S. 31
Sutherland, Lester E. 107

T

Tamanini, Francesco 99

Tang, M.J. 235
Torres, Anthony J. 1

V

Valiulis, John V. 99
van Wingerden, Kees 17

W

Wilhelm, S. Mark 178
Willey, Ronald J. 195
Williams, Gerald P. 78
Woodward, John L. 25
Worthington, David R.E. 25

Z

Zalosh, Robert G. 99

A

Application of ISA S84.01 to SIS in the Chemical and Petrochemical Industries. . .. .221

Titles

Application of Pressure Nutsche Filtration and Drying Technology for Toxic Chemicals . .161
Avoiding Exposure to Mercury During Inspection and Maintenance Operations in Oil and Gas Processing 178

B

Batch Purge Caused by Confusing Control System Displays 113

C

Can Solvent Choices Enhance Both Process Safety and Efficiency? 1
Comparison of EPA Guidelines Tables With a Commercial Model 25
Comparison of Safety Integrity Level Selection Methods and Utilization of Risk Based Approached . . . . . .
Constraints on Inherently Safer Design and Other Innovations 64
Contribution of Human Factors to Incidents in the Petroleum Refining Industry 206

D

Developing Screening Risk Evaluation Criteria for Facility Siting Vapor Cloud Explosion Hazards 50

E

Effects of Explosive Blast on Structures and Personnel 5
Electrostatic Ignitions in Everyday Operations - Three Case Histories 241
Emergency Relief Adequacy for Acrylic Polymerization Processes 71
Experiences with Heavy Fuel-Oil Firing in a Steam Reformer 82
Experiments on the Propagation of Vented Dust Explosions to Connected Equipment 99
Explosion Hazard Analysis for an Enclosure Partially Filled With a Flammable Gas 170

F

Flammability Limits of Dusts: Minimum Inerting Concentrations 56
Flammability Zone Prediction Using Calculated Adiabatic Flame Temperatures 127
Flammable Liquid Storerooms: Fire Protection without Halon 1301 31

H

Hazard Identification Analysis of a Hydrogen Plant 166

I

Inspection, Testing and Maintenance of Fire Protection Systems at Industrial Plants 151

L

Layer of Protection Analysis and Inherently Safer Processes 214

N

New Set of Blast Curves From Vapor Cloud Explosion, A . . . . . .

O

Oxychem Y2K Contingency Planning 146

P

Predicting Blast Overpressures Caused by Vapor Cloud Explosions in the Vicinity of Control Rooms 17
Pressure Relief Valve Piping Failures and Fire: Ammonia Synthesis Loop 107

R

Risk Analysis: An Investment in Engineering 121
Risk Management Plans for Existing Control Rooms 201

S

SACHE Case Histories and Training Modules 195
SACHE Essay - Process Safety in Education W5
Safety Instrumented System Design: Lessons Learned 156
Safety Performance in Ammonia Plants: Survey VI 78

U

Use of Aerosol Fire Extinguishing Generators at Rotogravure Fed Presses 35
User Friendly System for Probabilistic Fault Tree Analysis 42
Using Constant Slip Ratios to Model Non-Flashing (Frozen) Two-Phase Flow Through Nozzles 89
Using Quantitative Risk Assessment to Develop a Cost Effective Spill Prevention Program 212

W

When You Cut Down a Tree, Keep an Eye on the Forest .....
Why DIERS Technology Should be Used in Risk Assessment: Call for a 1999 Worldwide Benchmarking Survey on Various Risk Reduction Methods Used 115
World's Worst Industrial Accident of the 1990's - What Happened and What Have Been: A Quantitative Study 135

Subjects

A

Acrylic polymerization processes 71
Aerosol fire extinguishing generators, use of 35
Ammonia
plants, safety performance in 78
synthesis loop, valve piping failures and fire ..107

B

Batch purge 113
Blast(s)
curves from vapor cloud explosion 235
effect of 5
predicting 17

C

Calculated adiabatic flame temperatures 127
Chemical operations, electrostatic ignitions in ...241
Control system, confusing displays 113

D

DIERS technology in risk assessment 115
Dust(s)
explosions, vented 99
flammability limits of 56

E

Electrostatic ignitions 241
Emergency relief 71
Explosive(s)
blast, effects of 5
Explosions, vented dust 89

F

Filtration and drying technology 161
Flame temperatures, calculated adiabatic 127
Fire
extinguishing generators 35
hazard classification system 225
pressure relief valve piping failures and 107
protection 31, 151
Flammable
gas, explosion hazard analysis 170
liquid storerooms 31
Flammability zone prediction 127
Fuel-oil-firing in a steam reformer 82

G

Gas
hazard analysis for flammable 170
processing 178

H

Halon 1301, fire protection without 31
Hazard(s)
classification system for liquids 225
identification analysis 166
vapor cloud explosion 50

I

Industrial accident, a quantitative study 135
Inherently Safer
design, constraints on 64
processes 214

L

Liquids, fire hazard classification system for 225

M

Maintenance of fire protection systems 151
Mercury, avoiding exposure to 178

N

Nozzles, non-flashing (frozen) 89

O

Oil and gas processing 178

P

Petroleum refining industry 206
Plants
ammonia, safety performance in 78
fire protection systems at 151
Pressure refief valve piping failures 107
Production analysis, layer of 214
PROFAT (probabilistic fault tree analysis) 42

Q

Quantitative risk assessment 212

R

Risk
analysis. 115, 121
assessment. 212
based approaches 189
evaluation criteria for facility siting 50
management plans 201
reduction methods 115
Rotogravure fed presses 35

S

SACHE case histories 195
Safety
and efficiency 1
instrumented systems design 156
integrity level selection methods 189
performance in ammonia plants 78
SIS (safety instrumented systems) 221
Solvent choices to enhance process safety 1
Spill prevention program 212
Steam reformer, fuel-oil-firing in 82

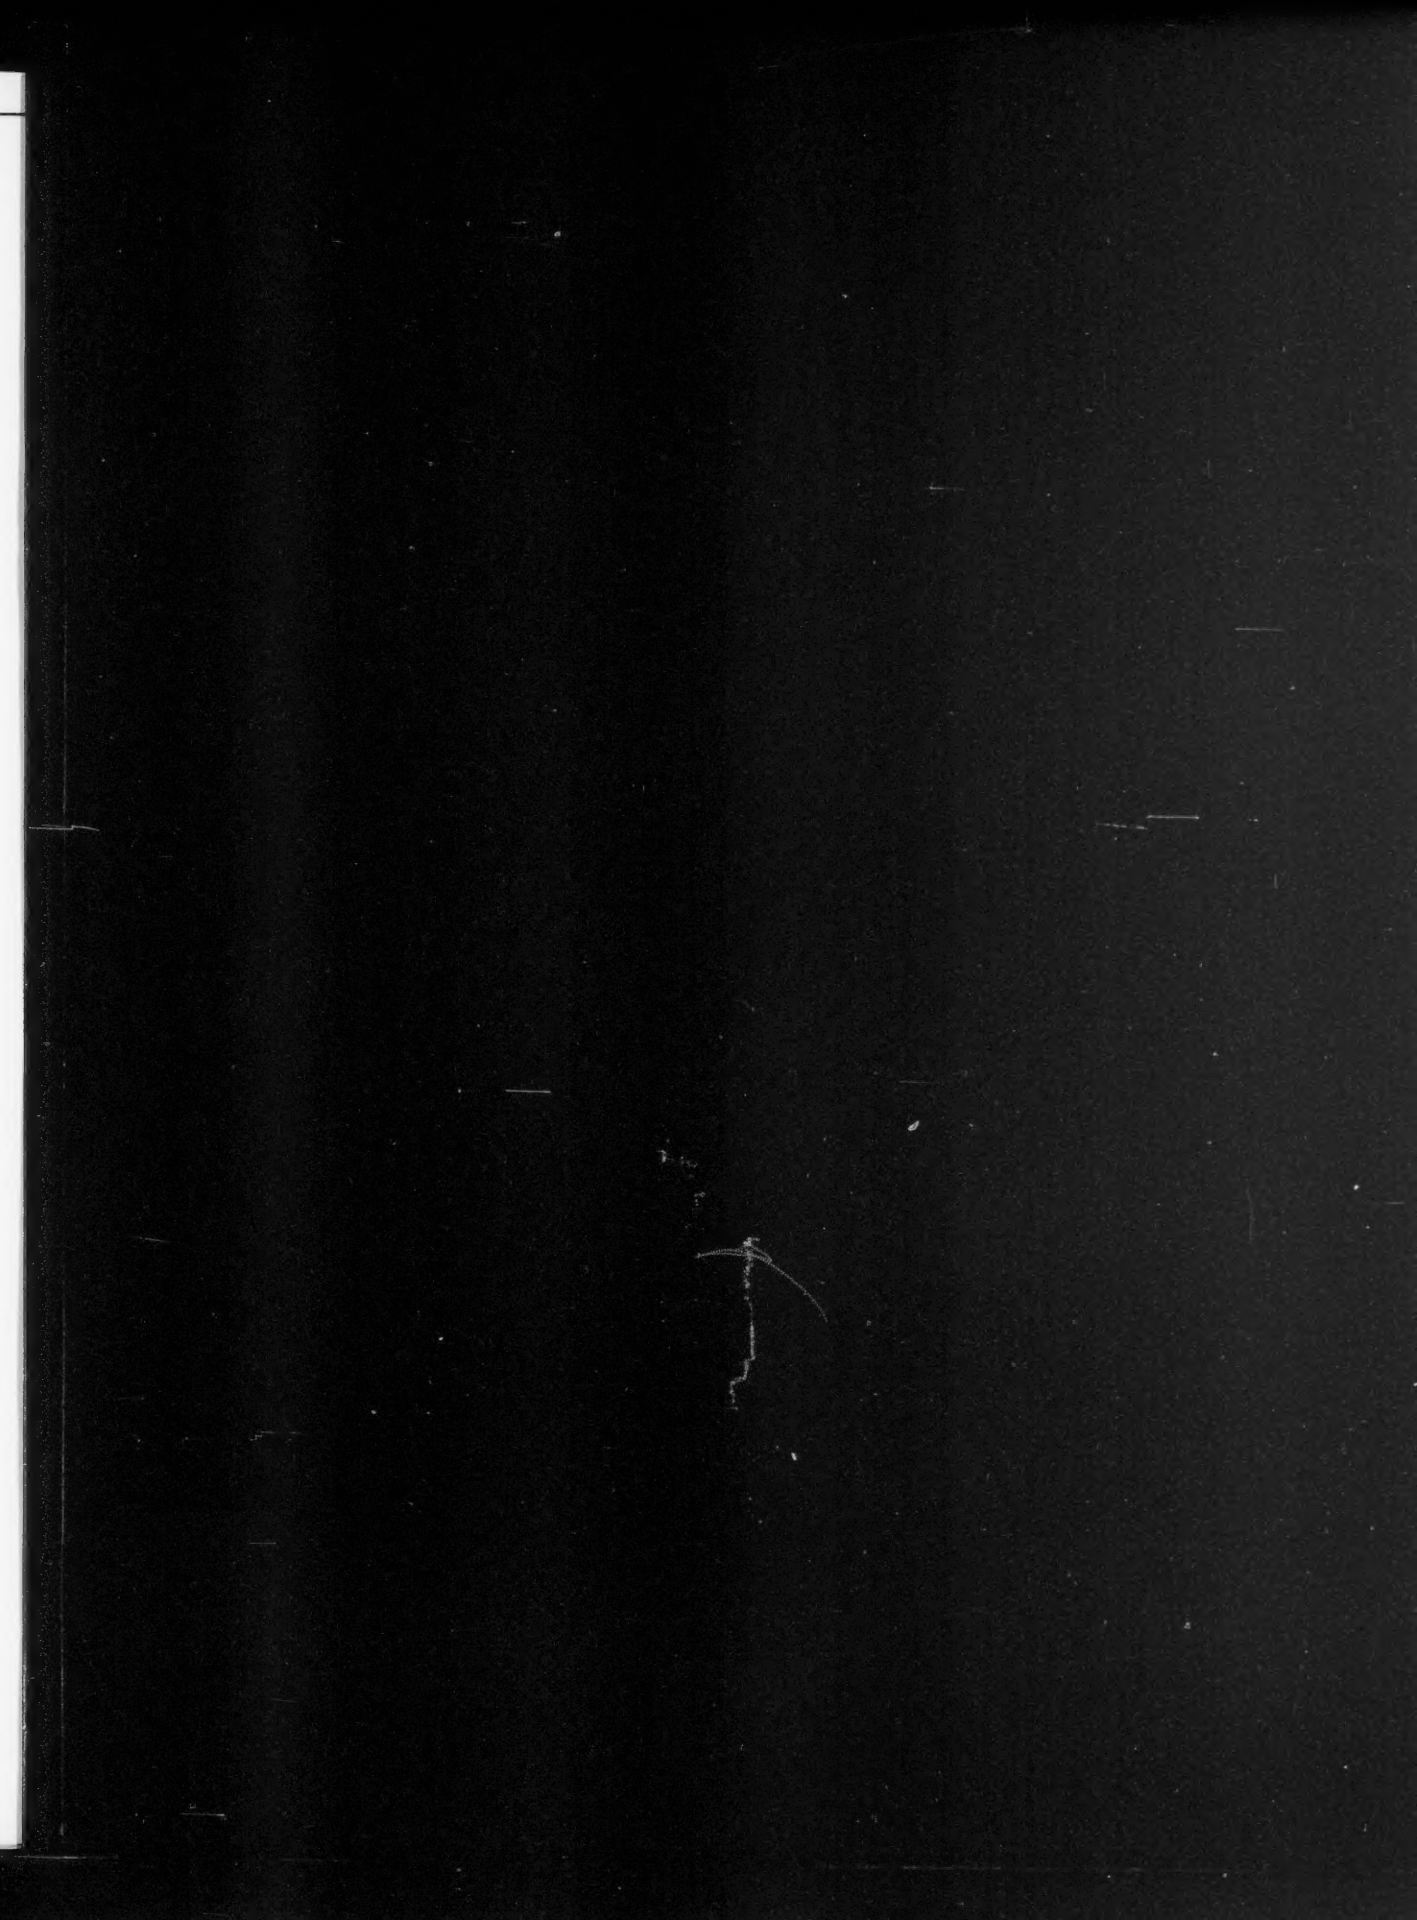
T

Toxic chemicals, filtration/drying technology for .161
Two-phase flow through non-flashing nozzles . . .89
Training methods (SACHE) 195

V

Valve, pressure relief 107
Vapor cloud explosion. 17, 50, 235
Vented dust explosions 89

Y

Y2K contingency planning 146


Statement of Ownership, Management, and Circulation (required by 39 U.S.C. 3685) of September 1, 1999, for *Process Safety Progress* Publication No. 689-410, issued quarterly for an annual subscription price of $225 from 3 Park Avenue, New York, NY 10016-5901, which is the location of its publication and business offices. The name and address of the Publisher, Editor, and Managing Editor are: Publisher, Stephen R. Smith, 3 Park Avenue, New York, N.Y. 10016-5901; Editor, T.A. Ventrone, 3 Park Avenue, New York, N.Y. 10016-5901; Managing Editor, Maura Mullen, 3 Park Avenue, New York, N.Y. 10016-5901. The owner is: American Institute of Chemical Engineers, 3 Park Avenue, New York, N.Y. 10016-5901. The known bondholders, mortgagees, and other security holders owning or holding one percent or more of the total amount of bonds, mortgages, or other securities are: None. The purpose, function, and nonprofit status of this organization, and the exempt status for federal income tax purpose have not changed during the preceding 12 months. The following figures describe the nature and extent of the circulation of the Fall 1999 issue. In each category the first number *(in italics)* is the average number of copies of each issue during the preceding 12 months. The number next to it, within parentheses ( ), is the actual number of copies of the single issue published nearest to the filing date. Total number of copies printed (net press run): *(2750)* 2500. 1. Paid/requested outside-county mail subscriptions stated on form 3541: *(2066)* 1987. 2. Paid in-county subscriptions: None. 3. Sales through dealers and carriers, street vendors, counter sales, and other non-USPS paid distribution: None. 4. Other classes mailed through the USPS: None. Total paid and/or requested circulation: *(2066)* 1987. Free distribution outside the mail: None. Total free distribution: *(15)* 15. Total Distribution: *(2081)* 2002. Copies not distributed: *(669)* 498. Total: *(2750)* 2500. Percent paid and/or requested circulation: *(99.28%)* 99.25%. I certify that the statements made by me are correct and complete. Stephen R. Smith, Senior Director, Publications.
